\*KC Metro includes data submitted by hospitals in Kansas and Missouri within the Kansas City Metro area counties: Johnson, Leavenworth, Miami, Wyandotte in Kansas and Bates, Cass, Clay, Clinton, Jackson, Lafayette and Ray in Missouri. NE District does not include KC Metro counties. *Rehabilitation and Specialty hospitals are not included beginning 10/30/2020* A map of the KHA districts is available at the [KHA website](#).  
 \*\*The percentage of IP beds available is based on the total number of beds used (ICU & Inpatient) divided by total staffed beds (not displayed) both ICU and inpatient. The percentage of ICU beds available is based on the total number of ICU staffed beds divided by the ICU beds used. And, this includes ALL patients, not only COVID patients.  
 \*\*\*Number of patients with suspected or laboratory-confirmed COVID-19 who died on the previous calendar day of reporting **in the hospital and hospital ED**.

1. HHS Protect statistics are based on the most recent of past 4 days (11/120-11/23) self-reported entries to the HHS Teletracking system . The Hospitals Reporting indicates the number of facilities reporting at least one data point for the day  
 2. HHS Protect statistics from prior days reporting  
 Please direct questions regarding this dashboard to [Sally Othmer](#)

## Percentage of Positive Covid-19 Tests in Kansas

## Weekly New Cases - Monday<sup>3</sup>

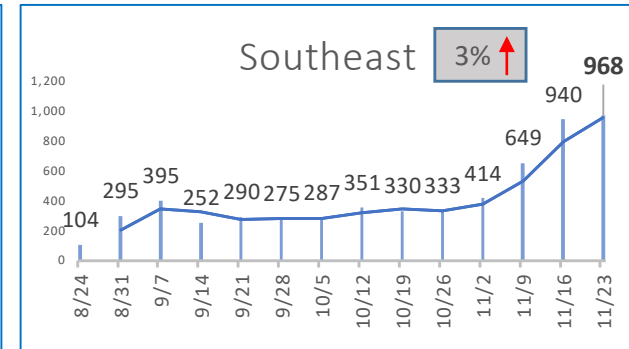

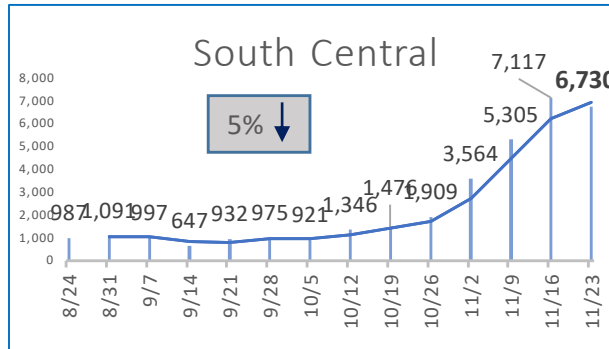

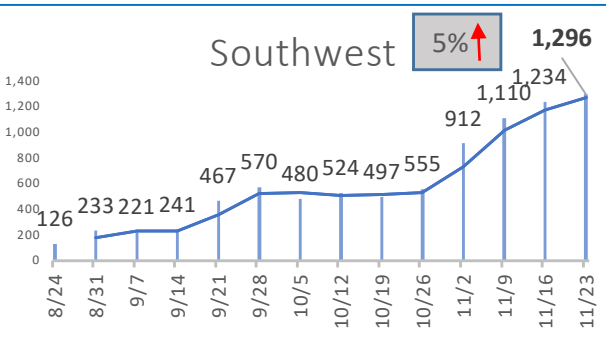

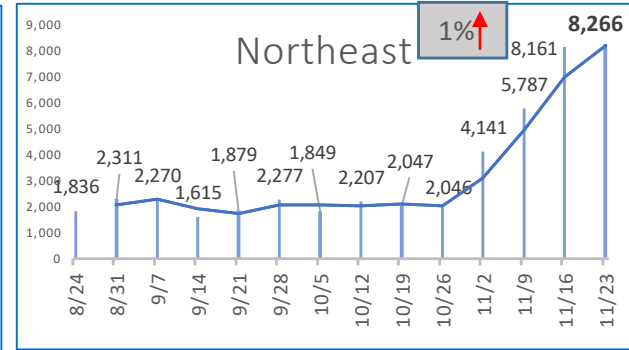

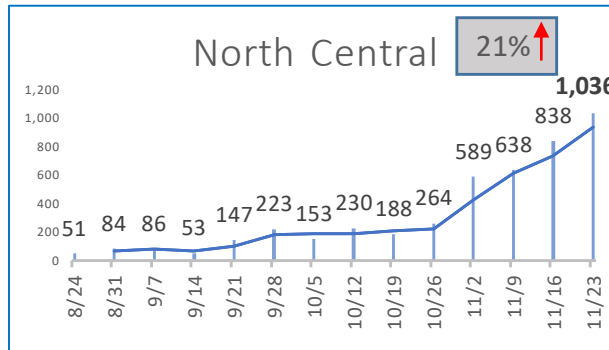

## Kansas COVID-19 Cases<sup>3</sup>, Hospitalizations<sup>4</sup> and Deaths<sup>3</sup>

3. A case is defined by a person who tested positive for the novel coronavirus (SARs-CoV-s), which causes Coronavirus Disease 2019 (COVID-19). Confirmed and probable cases are reported in this dashboard. A probable case is defined as a person with a) presumptive lab evidence (serology) with COVID-19 symptoms or epi-linked to a confirmed case, or b) no lab testing with COVID-19 symptoms and epi-linked to a confirmed case. - Last updated 11/23/2020 – Based on statistics from KDHE for Kansas residents

4. Hospitalizations include only Kansas hospitals

## COVID-19 New Cases By KHA Region<sup>5</sup> As reported weekly on Monday – last 90 days

## Kansas COVID-19 Cases - Percentage New Cases of state population Rolling 14 day average

5. A case is defined by a person who tested positive for the novel coronavirus (SARs-CoV-s), which causes Coronavirus Disease 2019 (COVID-19). Confirmed and probable cases are reported in this dashboard. A probable case is defined as a person with a) presumptive lab evidence (serology) with COVID-19 symptoms or epi-linked to a confirmed case, or b) no lab testing with COVID-19 symptoms and epi-linked to a confirmed case. - Last updated 11/23/2020 – Based on statistics from KDHE for Kansas residents

KS Counties with NEW COVID-19 Cases\* 103

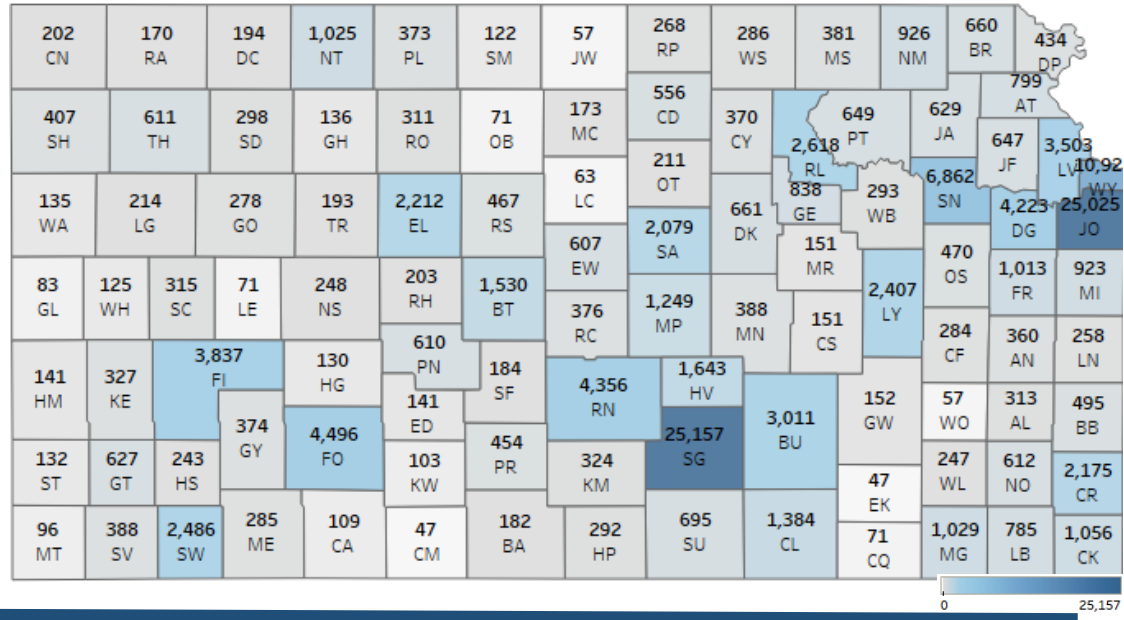

Percentage of counties with NEW cases 98%

Counties with highest number of new cases\*

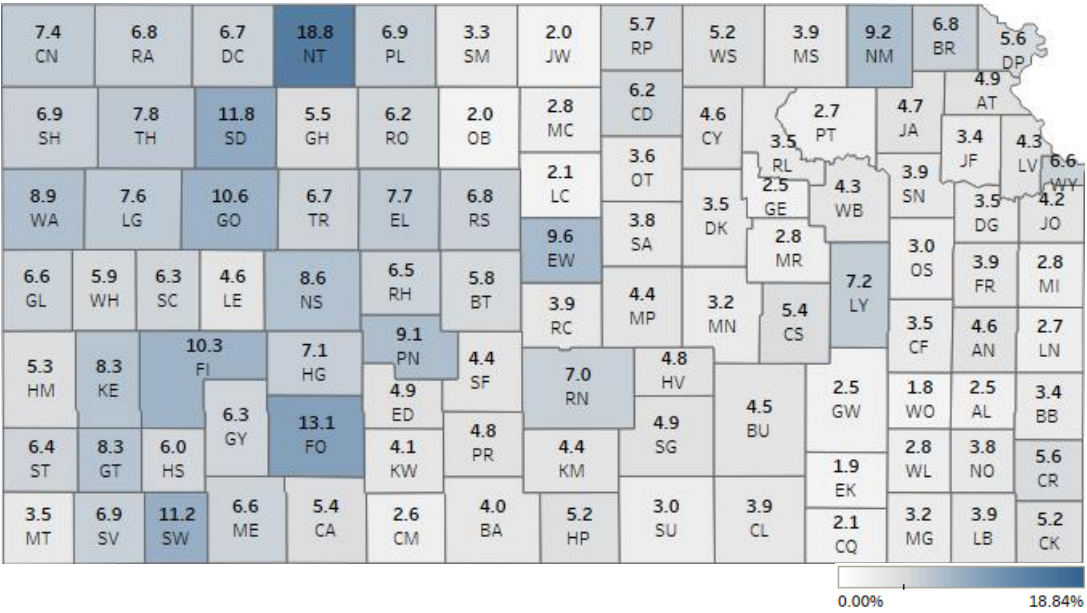

Sedgwick	1,681	Butler	221
Johnson	1,134	Douglas	219
Shawnee	481	Lyon	177
Wyandotte	389	Riley	172
Reno	231	Saline	139

 7. Combined KDHE COVID data and US Census Data

## COVID-19 Data Submission to TeleTracking as of October 6, 2020

- Capacity and Utilization Data
  - Hospitals and acute/post-acute medical facilities should report daily (all 7 days)
  - Exception: Saturday and Sunday data may be reported on [Monday](#)
- PPE data must be reported on Wednesday (collection date)
- Submit data to TeleTracking™ <https://teletracking.protect.hhs.gov>

### TeleTracking Reporting Updates

HHS requires COVID-19 related data to be reported into TeleTracking daily with the option to report weekend data the following Monday or Tuesday. On November 19th, a new date selection drop down was added to the U.S. Healthcare COVID-19 Portal Web Form. This feature allows users to enter data for the present day or as far back as seven days directly from the web form interface.

On November 21st, a new Daily Compliance section under the Capacity & Utilization tab of the Portal allows users will to see whether or not they were compliant within the past seven days (including the present day) at the facility level. In order to be considered compliant, facilities must have submitted all required values for any given day; if more than 1 value is missing, then the facility will be considered non-compliant for that day.

The new data selection drop down will facilitate hospitals ability to correct prior submissions considered non-compliant.
