

OVERVIEW

The study was conducted for CNN by SSRS with a representative samples of registered voters in Kansas (n=838). SSRS is an independent research company. Surveys were obtained online and by telephone from **October 20-October 26, 2026**. More information about SSRS can be obtained by visiting www.ssrs.com.

Results for likely voters include all registered voters interviewed for the poll weighted by their predicted probability of voting in the 2026 general election. Unless otherwise noted, results are reported below for likely voters. Results among likely voters have a margin of sampling error of +/-4.5% points at the 95% confidence level including design effects.

EMBARGOED FOR RELEASE: Thursday, October 29 at 5:00 a.m.

NOTE ABOUT RESULTS

Question text noted in parentheses was rotated or randomized. Values less than 0.5 percent are indicated by an asterisk (*).

For more information about other trend data included in this topline, please see the "More on Methodology" section at the end of this document.

NOTE ABOUT CROSSTABS

Surveys were conducted among a representative sample of registered voters in each state. Members of demographic groups not shown in the published crosstabs are represented in the results for each question in the poll. Crosstabs on the pages that follow only include results for subgroups with a minimum n=125 unweighted cases. Results for subgroups with fewer than n=125 unweighted cases are not displayed and instead are denoted with "SN" because samples of that size carry larger margins of sampling error and can be too small to be projectable with confidence to their true values in the population.

V9. How motivated, if at all, would you say you [are/were] to vote in this election? **[RESPONSES ROTATED IN ORDER FOR HALF/IN REVERSE ORDER FOR HALF]**

Kansas likely voters	Extremely motivated	Very motivated	Somewhat motivated	Not too motivated	Not at all motivated	No opinion
Oct. 20-Oct. 26, 2026	63%	18%	15%	3%	2%	0%

S1KS. IF HAVE NOT VOTED: If the election for U.S. Senate were held today and the candidates were Adam Hamilton, the Democrat, and Roger Marshall, the Republican, who would you be more likely to vote for?

IF ALREADY VOTED: Thinking about the election for U.S. Senate, did you vote for Adam Hamilton, the Democrat, or Roger Marshall, the Republican? **[RESPONSES HAMILTON AND MARSHALL ROTATED IN ORDER FOR HALF/IN REVERSE ORDER FOR HALF]**

S1aKS. IF HAVE NOT VOTED: If the election for U.S. Senate were being held today, as of today, do you lean more toward:

IF ALREADY VOTED: Your answers are important to us, and we don't want someone else to speak for you. Keeping in mind that this is a confidential survey, we'd really appreciate it if you would tell us how you voted in the election for U.S. Senate. **[RESPONSES HAMILTON AND MARSHALL ROTATED IN ORDER FOR HALF/IN REVERSE ORDER FOR HALF]**

Advanced degree	16%

MORE ON METHODOLOGY

A total of n=838 registered voters in Kansas were surveyed online and by telephone from a registration-based sample (RBS) purchased by SSRS from L2 (n=669) and through the SSRS Opinion Panel (n=169). The SSRS Opinion Panel is a nationally representative panel of U.S. adults ages 18 or older recruited using probability-based sampling techniques.

Voters from the RBS were invited to participate in the study through multiple contact methods, including a mailed postcard, SMS (text-message) invitation in collaboration with Survey160 to sample those who had a cell phone number on file, email invitations to those with an email address on file, and multiple telephone call attempts to voters with a telephone number on file. Upon receipt of the postcard, sampled voters could complete the survey online (including by scanning a QR code on mobile devices) or by calling a toll-free number. Voters from the SSRS Opinion Panel were invited to participate in the study through email invitations, telephone call attempts, and SMS (text-message) reminders. All respondents were screened for age, voter registration status, and state of voter registration prior to administering the survey. Respondents who said they were under 18, not registered to vote, or not registered to vote in the state on file were excluded from the survey. Those who did not confirm they were the named person on the voter file were also excluded from analysis. Surveys were conducted in English and Spanish.

All respondents were asked questions concerning basic demographics. The entire sample was weighted to reflect Census figures for the state's registered voters for education, race/ethnicity and race/ethnicity by education. The sample was also weighed to parameters from the L2 voter file for gender by age, gender by race, age by race, Voter Poll region, Census tract-level population density, 2024 vote mode, modeled 2024 vote preference alone and crossed with age, race, party registration, and 2024 vote mode. Additional weighting parameters included 2022 by 2024 turnout, 2024 partisan primary participation, 2026 early voter turnout, and party registration by a modeled voter-file likely voter score. Finally, the samples for each state were weighted among validated 2024 voters for recalled 2024 vote within Voter Poll regions. The benchmark for recalled 2024 vote was taken from county-level Voter Poll presidential election results. The modeled 2024 vote preference was included for 2024 non-voters.

Results for likely voters include all registered voters interviewed for the poll weighted by their predicted probability of voting in the 2026 midterm election. This likely voter weight was created by multiplying the registered voter weight by the modeled probability of voting in the 2026 midterm election. For voters age 18-29, the probability of voting was calculated as .25 times the modeled voter file score plus .75 times the self-report score. For validated 2024 voters and those who registered on or after the 2024 election ages 30+, the probability of voting was calculated as 0.75 times a voter file score plus 0.25 times a self-report score. For non-2024 voters who registered before the 2024 election age 30+, the probability of voting was calculated as 0.90 times a voter file score plus 0.10 times a self-report score.

Surveys were conducted among a representative sample of the adult registered voters, age 18 or older, in Kansas. Members of demographic groups not shown in the published crosstabs are represented in the results for each question in the poll. Crosstabs on the pages that follow only include results for subgroups with a minimum n=125 unweighted cases. Results for subgroups with fewer than n=125 unweighted cases are not displayed and instead are denoted with "SN" because samples of that size carry larger margins of sampling error and can be too small to be projectable with confidence to their true values in the population.

Results for likely Kansas voters have a margin of sampling error of +/- **4.5** percentage points. Among the Kansas sample, **26%** described themselves as Democrats, **42%** described themselves as Republicans, and **32%** described themselves as independents or members of another party.
